

GIRL CHILD

There are lots of problems faced with girls and the issue of girls should be taken more serious than never before. In our country Uganda % of the girls fall out of school due different reasons. Some get pregnant when still in school, others may fail to continue with school because their parents don't have enough money to carter for the family and at the same time send the young ones to school. Another reason is that some girls are seen as a source of wealth to the family through bride price, so they are stopped from school and sent into marriage. So there are many hindering problems facing the girls. As Butalaale Back to God primary we think girls have the same equal rights to education as the boys so we are taking the role to see that our girls are well guided to see that they are able to continue with education till the end. We provide counselling to them in order to have them focused and determined never to stop on the way. In uganda education has become number one Key to have a better future we desire that our girls can be part of this. With the issue of parents failing to send their children due to lack of enough money, we have taken part by giving out half bursaries to low income earning parents just to see that hope is given.

We at times provide the necessities to those that cannot afford for example books, uniforms, sanitary towels, pens etc.

Please note that there are many girls falling out of school in rural areas than town areas this is because that people in rural are low income earners. Butalaale Back To God we are founded in rural uganda and we still need more help just to see that a big number of girls go to school.

We want to use this opportunity to welcome volunteers in person and in groups to donate towards the Girl child program. Please join us and let us change the lives of the young girls out there.
